

STEP-BY-STEP GUIDE

Pair your asset in S-HUB

Linking a tracker to an asset takes less than a minute. Follow the five steps below to connect a physical tracker to the right asset in your S-HUB workspace.

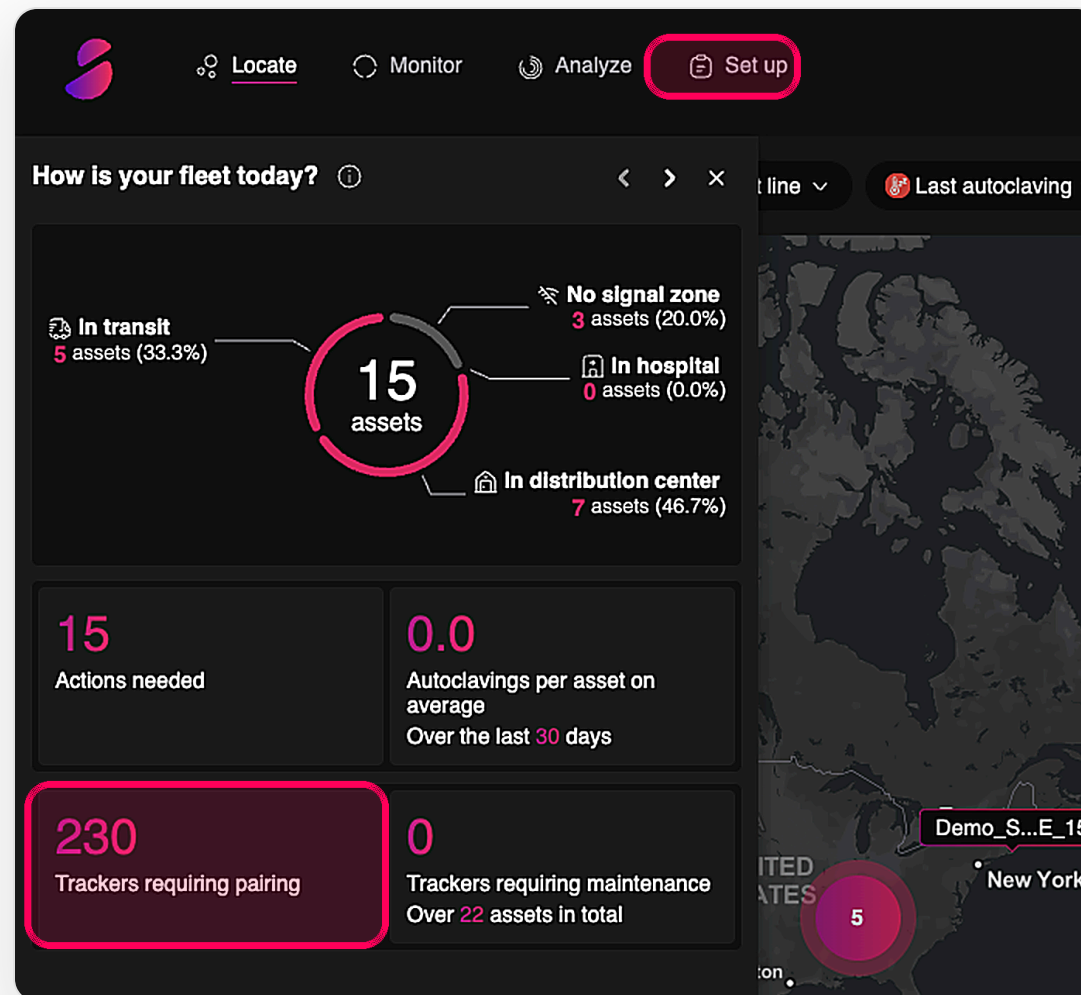

WHAT YOU'LL NEED

- 1 Access S-HUB
- 2 Your tracker in hand

1

Open the list of assets to pair

Sign in to S-HUB. On the **Locate** home screen, open “How is your fleet today?” and click **Trackers requiring pairing**. You can also click **Set up** in the top menu to open the asset list directly.

2

Select your asset

You are now in **Set up › Assets**. Use the **filter** to choose the asset you want to pair — you can also filter by pairing status to see, at a glance, exactly which assets still need a tracker. Make your selection, then click **Apply**.

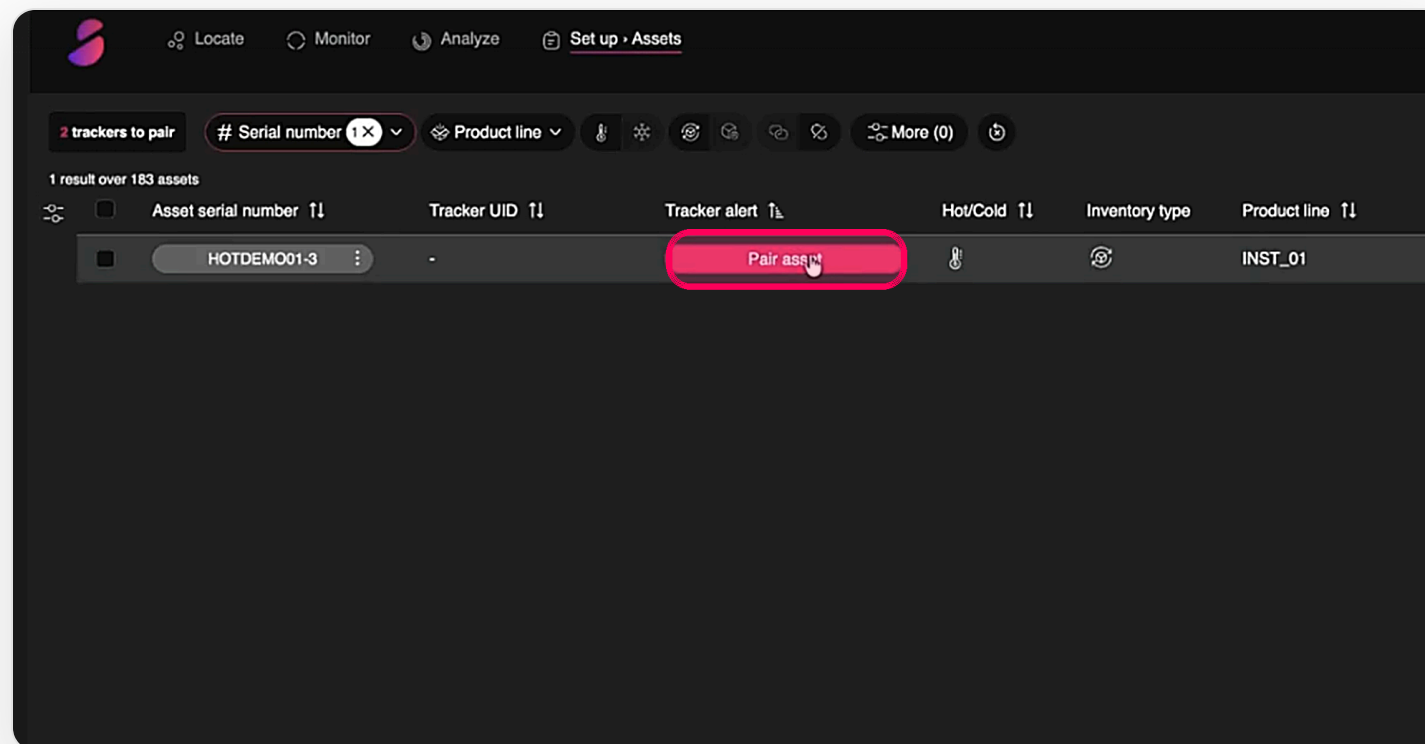

The screenshot shows the 'Set up › Assets' page in the SMADE interface. A modal search filter is open, displaying a list of assets with checkboxes. The 'HOTDEMO01-3' asset is selected. The background table lists various assets with columns for Tracker UID, Tracker alert, Hot/Cold status, Inventory type, and Product line.

Asset s	Tracker UID	Tracker alert	Hot/Cold	Inventory type	Product line
☐ HOTDEMO01-3		☐ Pair asset			INST_01
☐ HOTDEMO02-2	04-2435-002169	☒ All good			INST_02
☐ HOTDEMO03-2	04-2350-000749	☒ All good			INST_03
☐ HOTDEMO03-3	04-2435-001976	☒ All good			INST_03
☐ HOTDEMO04-3	04-2435-002142	☒ All good			INST_03
☐ HOTDEMO05-2	05-2449-002695	☒ All good			INST_04
☐ HOTDEMO05-3	05-2438-002592	☒ All good			INST_05
☐ HOTDEMO05-4	LC0304-2435-001724	☒ All good			INST_05
☐ HOTDEMO05-5	LC0305-2449-002696	☒ All good			INST_05
☐ HOTDEMO06-1	LC0305-2449-002699	☒ All good			INST_05
	LC0305-2449-002758	☒ All good			INST_06

3

Start pairing the asset

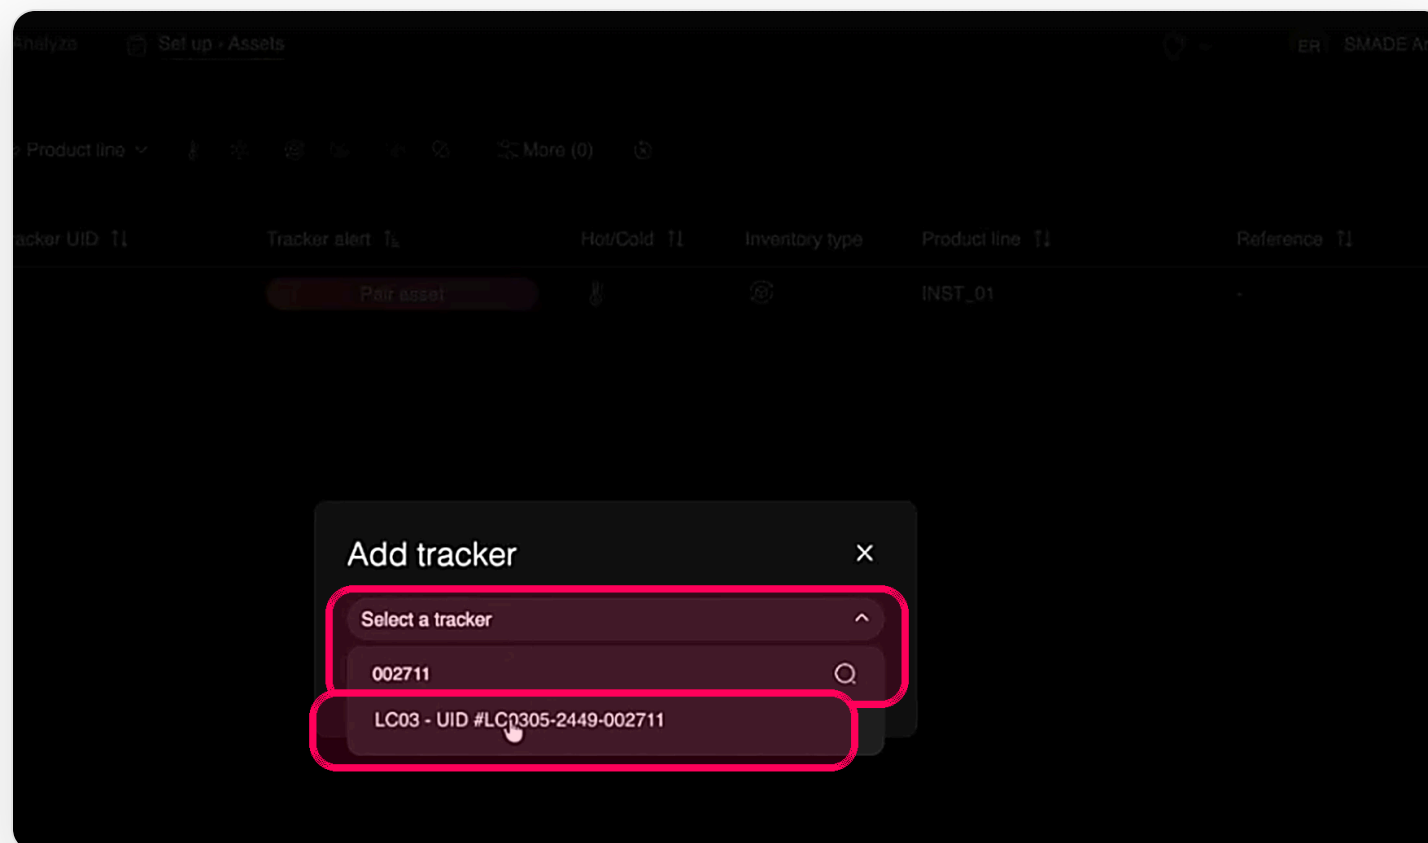

Your asset now appears on its own. In the **Tracker alert** column, click the **Pair asset** button to begin.

4

Select your tracker

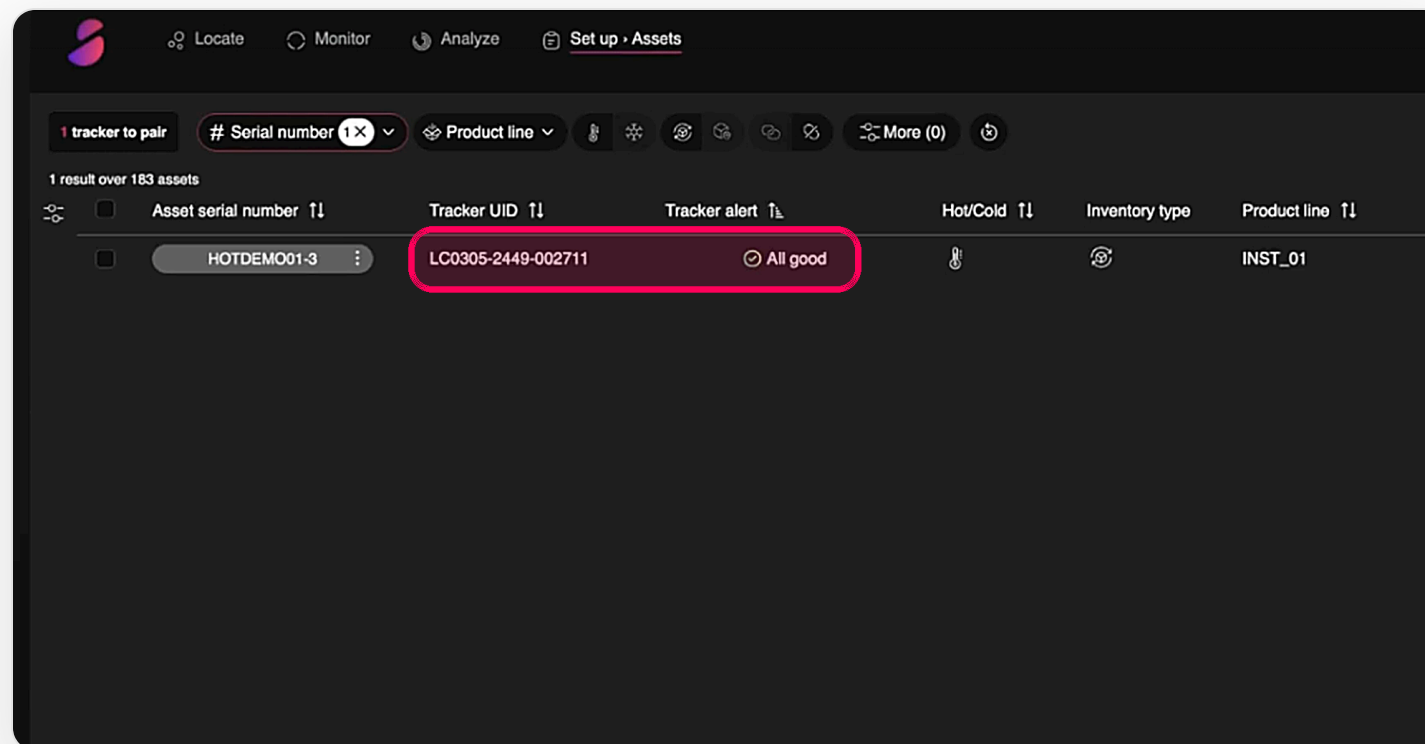

The **Add tracker** window opens. Type the number printed on your physical tracker into **Select a tracker**, then choose the matching **UID** (for example **LC0305-2449-002711**) to confirm.

5

All done

The **Tracker UID** now appears next to your asset and its status turns to **All good**. The “trackers to pair” counter drops by one — simply repeat these steps for any remaining assets.

YOU'RE ALL SET

Your asset is **paired.**

Your asset is now live in S-HUB. From here you can locate it, monitor its lifecycle and analyse its data like any other tracked asset.
